

NPI Match™

Minimize your financial risk with fast, accurate and affordable National Provider Identifier compliance for both Type 1 and Type 2 information.

If you're a healthcare payer, PPO, clearing house or lab, you know the challenges. With thinly stretched resources and budgets, the risks of being unprepared for NPI are significant. Without an accurate NPI number - for primary and secondary providers - you can expect increased electronic claim denials, reduced auto-adjudication rates and increased costs due to more paper submissions. The resulting effects on revenue, costs, cash flow, earnings and even valuation are potentially significant.

Further, mounting a full-blown IT project to comply with the National Provider Identifier (NPI) mandate is a huge challenge. So how can you bridge your provider information to the ever-changing NPIs and keep it in sync, quickly, easily, accurately and affordably?

We can answer that in three words: Enclarity NPI Match.

Enclarity NPI Match is a subscription service that creates and maintains a bridge between the NPPES file and your provider files. NPI Match adds correct, current NPI information to your provider data file and delivers an appended file back to you on a schedule that you choose. Built on the power of our Master Provider Referential Database, NPI Match uses our innovative AcuSync® process to deliver accurate, up-to-date NPI Type 1 and Type 2 information for all provider types.

By subscribing to NPI Match, you'll have a comprehensive, reliable and affordable way to bridge the information found in the NPPES database to your existing legacy provider records and claims. NPI Match keeps up with changes and overcomes out-of-date, deficient and erroneous data to bridge the NPPES database and your files, reliably assigning sub-parts, identifying parent organizations and providing proper taxonomy information. Quickly and affordably.

Make NPI work for you

There's no need to take the financial risk - or incur the costs - associated with dirty or missing data from a do-it-yourself approach to NPI in your claims processing. With NPI Match you can:

- Achieve NPI compliance reliably and affordably
- Maintain and update NPI numbers as new and changed provider information is received
- Attach the correct NPI numbers to your legacy provider file for claim matching and adjudication
- Use taxonomy values to validate the provider type with the submitted service on the claim
- Confirm sub-parts as part of the parent entity
- Validate and augment secondary and non-par provider information on a claim
- Determine if your provider has even obtained an NPI number

Crosswalk to NPI easily and affordably

NPI Match is the perfect solution for healthcare payers who just want an easy, accurate way to keep current with ever-changing NPI data and get the information they need to keep their crosswalk current. We safeguard the quality of our information and the ability to match NPPES files to your legacy files by continuously updating our provider database of over 140 million records, using advanced analytics to mine new sources and telephonically verifying data.

You can subscribe to NPI Match on a monthly, quarterly, semi-annual or annual basis. All you need to do is send your provider file to Enclarity in one of two standard formats, and within 10 business days, we'll return an updated file appended with an NPI number and taxonomy code. And if you find that you need correct, current and comprehensive information to clean and augment your entire provider file, consider Enclarity ProviderPoint®, our award-winning provider information solution.

Instead of having to worry about a costly, ongoing project to research NPI, do the crosswalking and file maintenance, let Enclarity do it for you. NPI Match interprets the NPPES file, and frees you from the hassles associated with updating your legacy files with replacements of the NPPES database. Powered by Enclarity, you can be confident that your business is taking the right steps to comply with the NPI mandate and keep potentially costly disruptions to the claim process at a minimum, so you can focus your time on growing your business.

Enclarity NPI Match. There is no more accurate, more reliable, or more affordable solution available to help your business manage the challenges of NPI compliance. Take action to minimize the significant financial risk of NPI compliance today.
